PRODUCT PRESENTATION

Studio OS for Interior Designers

Website · Studio ERP · Client portal · Automation · AI assistant — one connected system, made for Indian interior design studios.

Made for India: ₹ · GST · WhatsApp | Modular packages | White-label

Screens in this deck are from the working demo with a sample studio, “Aangan Interiors”.

WHO WE SERVE

Built for Indian interior design studios

Small and growing, owner-led studios that win work through Instagram, Google and referrals — and run projects on WhatsApp, Excel and phone calls today.

1

Owner-led studios

1–15 people. The owner sells, designs and manages — often from the phone.

2

Residential & commercial

1–4 BHK flats, villas, kitchens & wardrobes, offices, shops and cafés.

3

Turnkey & design-only

Studios that design, quote, buy material and execute on site — or design only.

4

Also a fit

Architects with an interior practice, modular kitchen/wardrobe brands, turnkey contractors.

What they want: more enquiries, look premium, save time on quotes and follow-ups, get paid on time, and see the business at a glance.

THE PROBLEM

Five things that slow every studio down

Enquiries get lost in WhatsApp

Instagram DMs, calls and referrals spread across phones — some never answered.

Designs shared as scattered images

Clients scroll old chats for the latest version; approvals are just “seen” ticks.

Quotations made by hand

Hours in Excel, GST mistakes, and every quote looks different.

Chasing payments

Nobody is sure which milestone is due or who has paid. Reminders feel awkward.

No view of the business

How many leads this month? Which projects are late? The answers live in your head.

OUR SOLUTION

One connected system

Start with one module, grow into all — everything shares the same data, brand and logins.

W — Website

Premium portfolio site that turns visitors into enquiries.

C — Website CMS

Update projects, photos, services and FAQs yourself.

E — Studio ERP

Leads, bookings, projects, GST quotations, invoices, reports.

P — Client portal

Clients approve designs and follow progress online.

A — Automation

Confirmations, reminders and follow-ups written for you.

AI — AI assistant

Answers questions 24×7 from your own studio knowledge.

EVERYTHING CONNECTED, END TO END

Visitor → Lead → Booking → Quotation → Design approved → Invoice → Payment → Dashboard

WHAT WE SELL

Modular packages — pick what hurts most today

Website

New studio, enquiries mostly from Instagram

- Home, portfolio, services, about, FAQ, contact
- Style quiz, cost estimator, online booking
- WhatsApp on every page, mobile-first

Website + CMS

Studio that posts new projects often

- Everything in Website
- Edit projects, photos, before/after, mood boards
- Services, testimonials, FAQs, homepage text

Studio ERP

Busy studio drowning in WhatsApp & Excel

- Leads board, bookings calendar, projects, tasks
- GST quotations & invoices with branded PDFs
- Payments, vendors, catalogue, reports

Automation

Many bookings and payment follow-ups

- Booking confirmations & reminders
- Quotation sent & payment due messages
- New-lead alerts & follow-up reminders

AI Assistant

Many repeat questions from visitors

- Website assistant that captures leads
- Studio assistant for the team
- Answers only from your knowledge, with sources

Complete System

Growing studio with a team

- All modules, connected end to end
- Client portal included
- Priority setup & team training

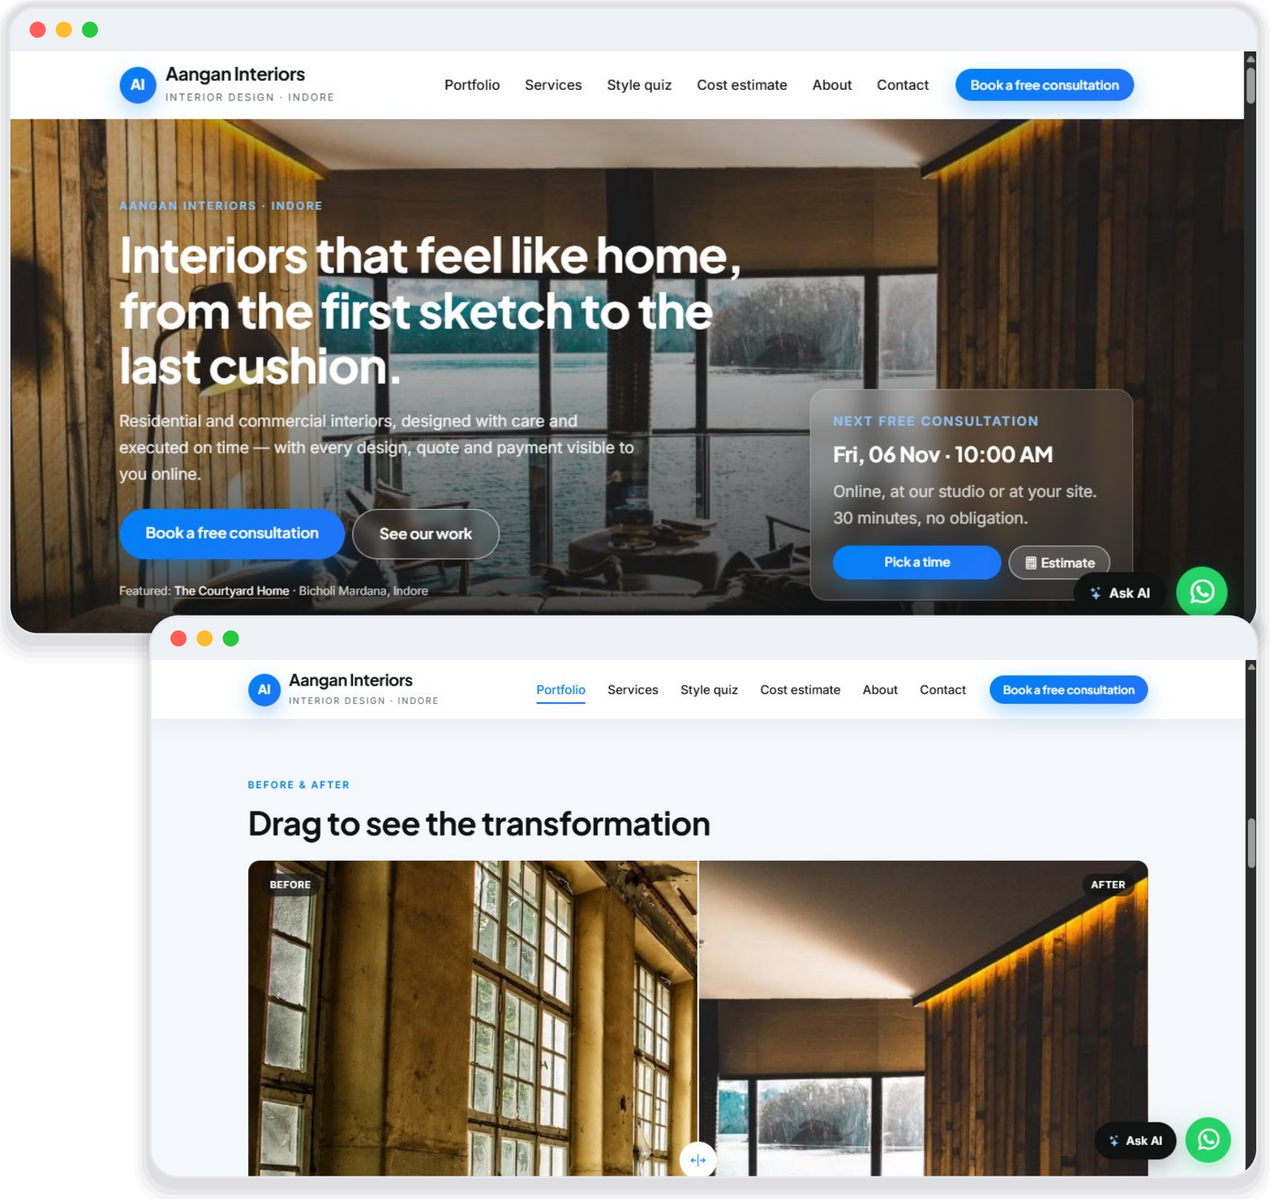

Simple pricing conversation: talk to us for your package. Easy payment options — pay in parts (booking, design approval, go-live) or a one-time setup with a small monthly plan.

MODULE 1 · WEBSITE

A premium website that brings enquiries

Your projects, your colours, your logo — fast on a mid-range phone, with WhatsApp one tap away.

- **Portfolio with filters** by room, style and budget
- **Case studies** gallery, before/after slider, mood board, timeline
- **Style quiz & cost estimator** warm leads with their details
- **Services, about, FAQ, contact** with map and working hours
- **SEO basics & social sharing** titles, descriptions, preview cards

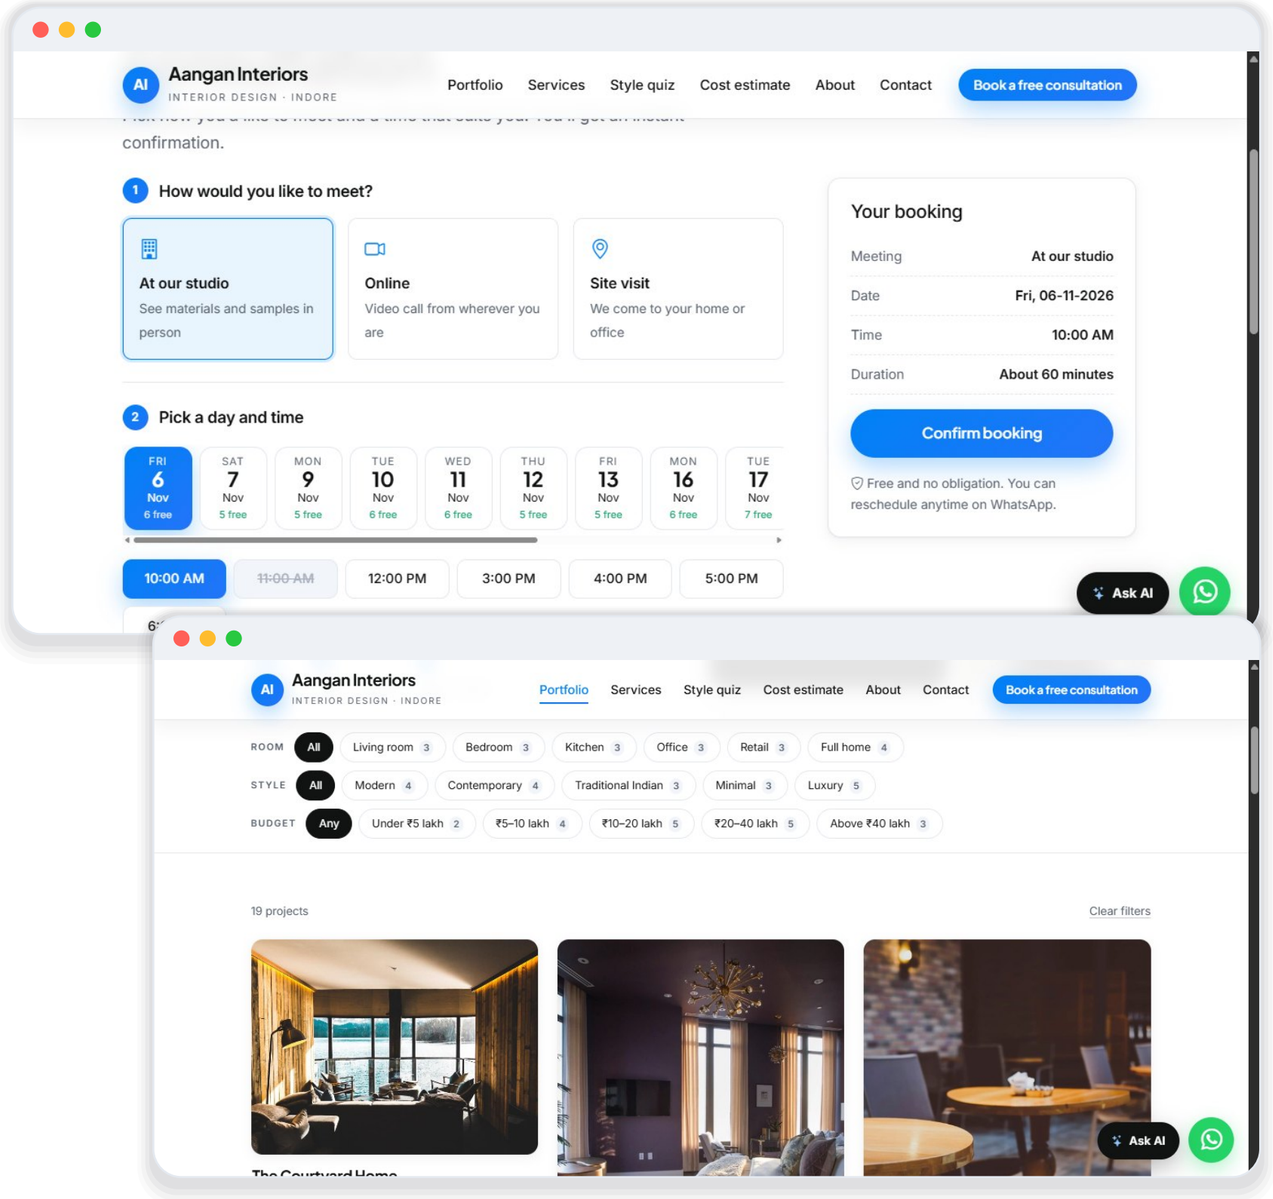

WEBSITE · ONLINE BOOKING

Clients book a consultation in 30 seconds

Only free slots from your calendar are shown. The booking appears instantly in your ERP.

- **Studio, online or site visit** client chooses how to meet
- **Live slots** your hours, holidays and 2-hour notice respected
- **No double booking** guaranteed by the database
- **Instant confirmation** calendar invite + WhatsApp message prepared
- **Lead created automatically** with source, property and budget

MODULE 6 · AI ASSISTANT

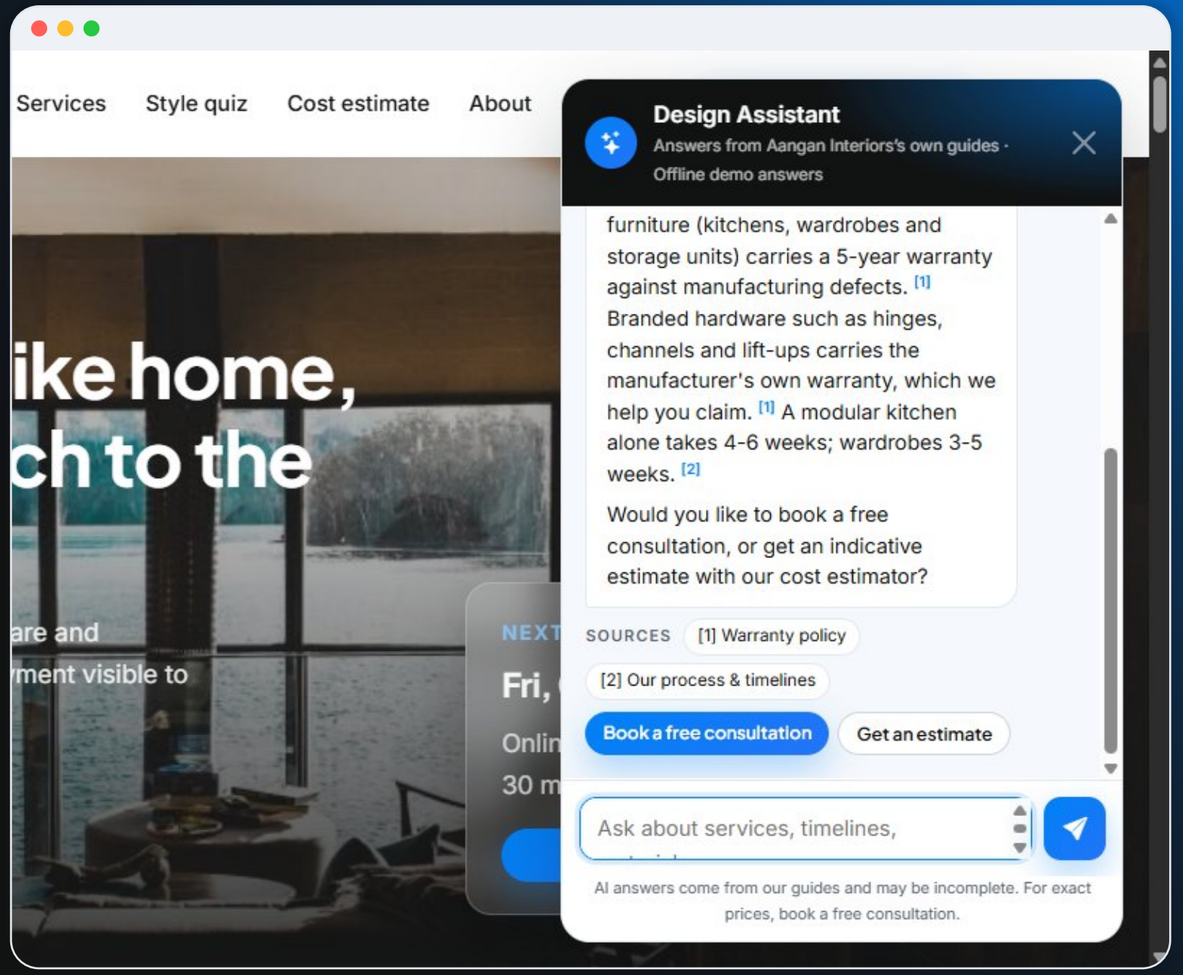

An assistant that knows your studio

It answers visitors 24×7 — warranty, process, timelines, services — and hands over to WhatsApp or a booking.

HOW IT WORKS — IN SIMPLE WORDS

1. **Finds**
   searches only your own documents: FAQs, services, warranty, process
2. **Writes**
   turns what it found into a short, friendly answer
3. **Shows sources**
   every answer cites [1] [2] — no made-up promises

- **Captures leads** asks for a number when the visitor is interested
- **Studio assistant** your team asks about internal SOPs and terms
- **You control the knowledge** add text or PDFs, test answers, read chat logs

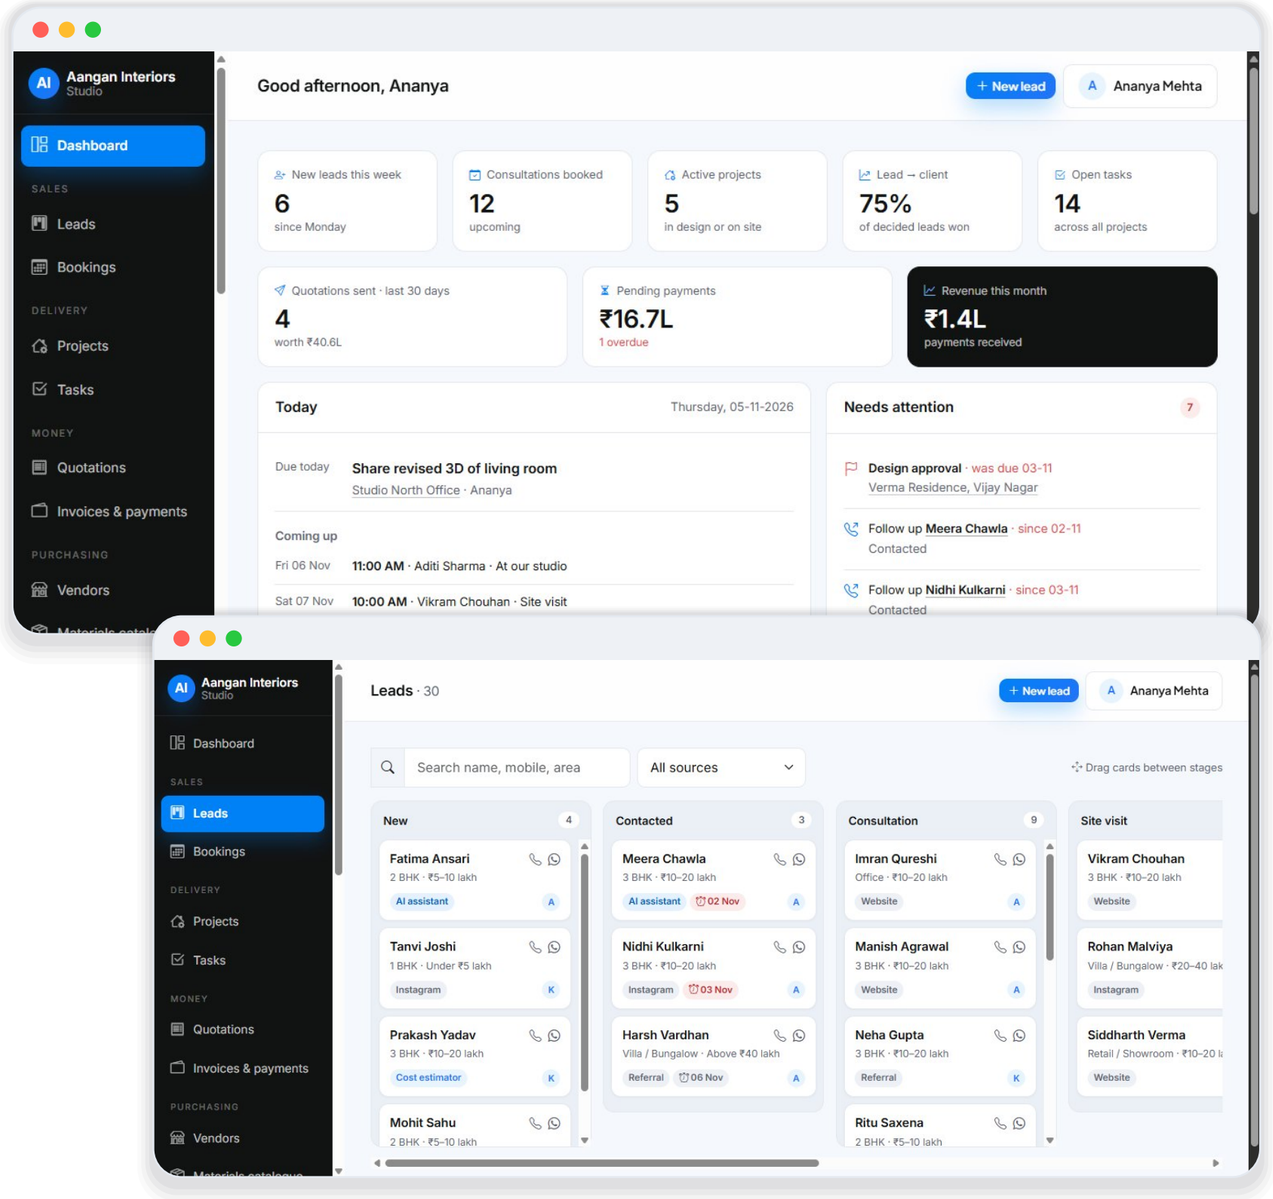

MODULE 3 · STUDIO ERP

Run sales and projects from one screen

Every enquiry, consultation and project in one place — on the laptop or the owner's phone.

- **Leads board** drag cards across stages; source, budget, follow-up date
- **Bookings calendar** drag to reschedule; studio, online, site visit
- **Projects & tasks** milestones, design versions, site updates, documents
- **Owner dashboard** leads, conversion, projects, payments — live
- **Team & roles** owner and team member logins

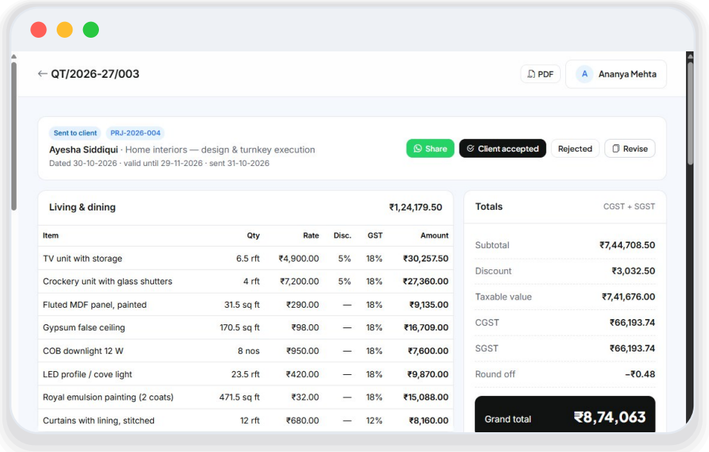

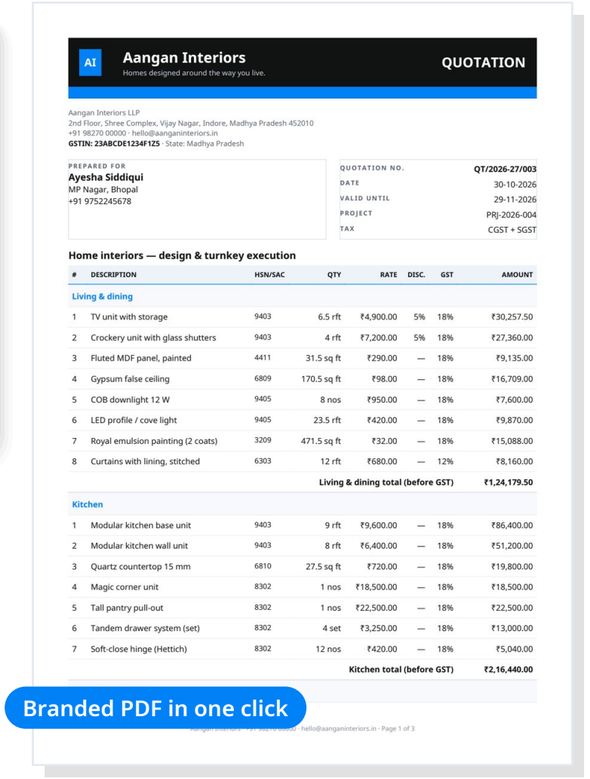

STUDIO ERP · MONEY

GST quotations in minutes, payments under control

Room-wise quotes from your materials catalogue, a branded PDF in one click, and invoices that follow your payment schedule.

- **GST done right** CGST + SGST or IGST, HSN/SAC, round-off, amount in words
- **Versions & approvals** revise, send on WhatsApp, mark accepted
- **Payment schedule** e.g. 10 / 40 / 40 / 10 — invoices raised per milestone
- **Invoices & payments** Indian FY numbering; UPI, bank, cash, cheque; part payments
- **Vendors & catalogue** rates, units, GST % ready for every quote
- **Reports** revenue by month, outstanding & overdue, CSV for your CA

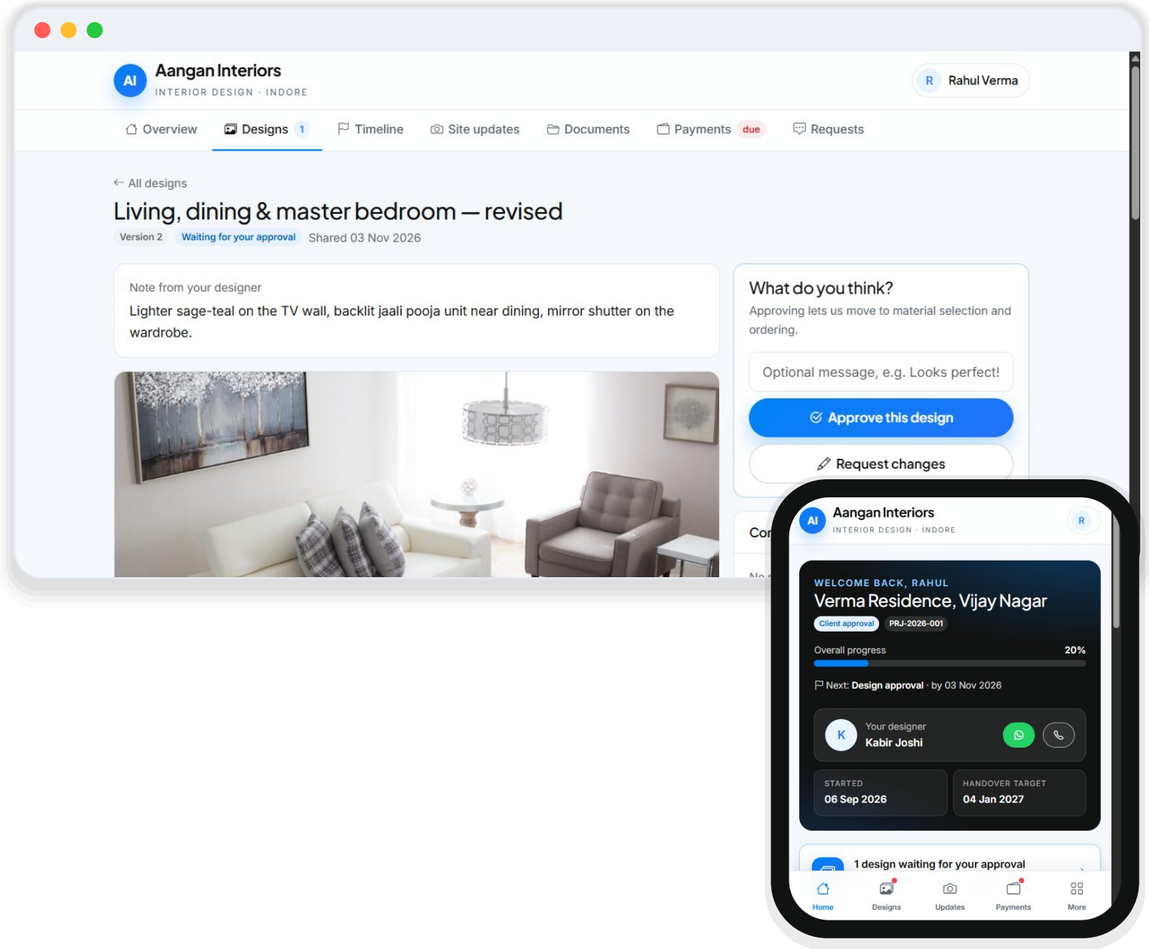

Branded PDF in one click

MODULE 4 · CLIENT PORTAL

Clients approve designs online — with a record

Each client gets a private, branded login. No more “I never approved this colour”.

- **Design versions** approve or request changes, with comments
- **Progress & timeline** milestones, next step, handover date
- **Site updates** photos from site, as work happens
- **Documents & payments** quotation and invoice PDFs, what is due
- **Requests & snags** become tasks for your team; you get a live alert

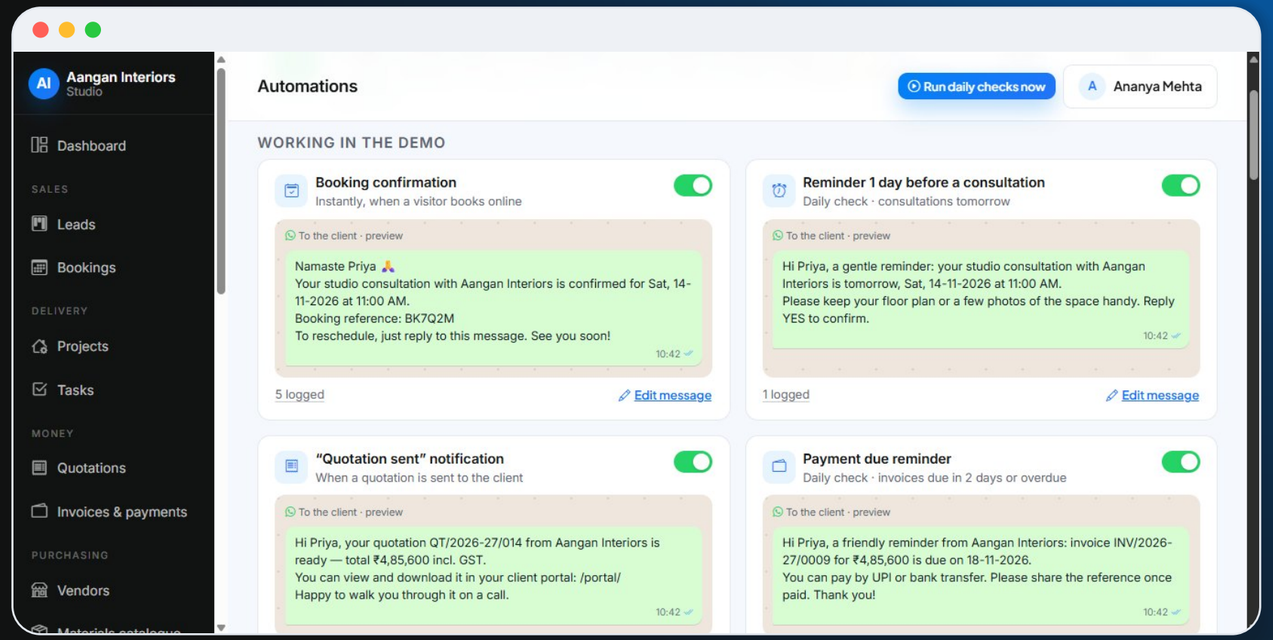

MODULE 5 · AUTOMATION

Every client message, written for you

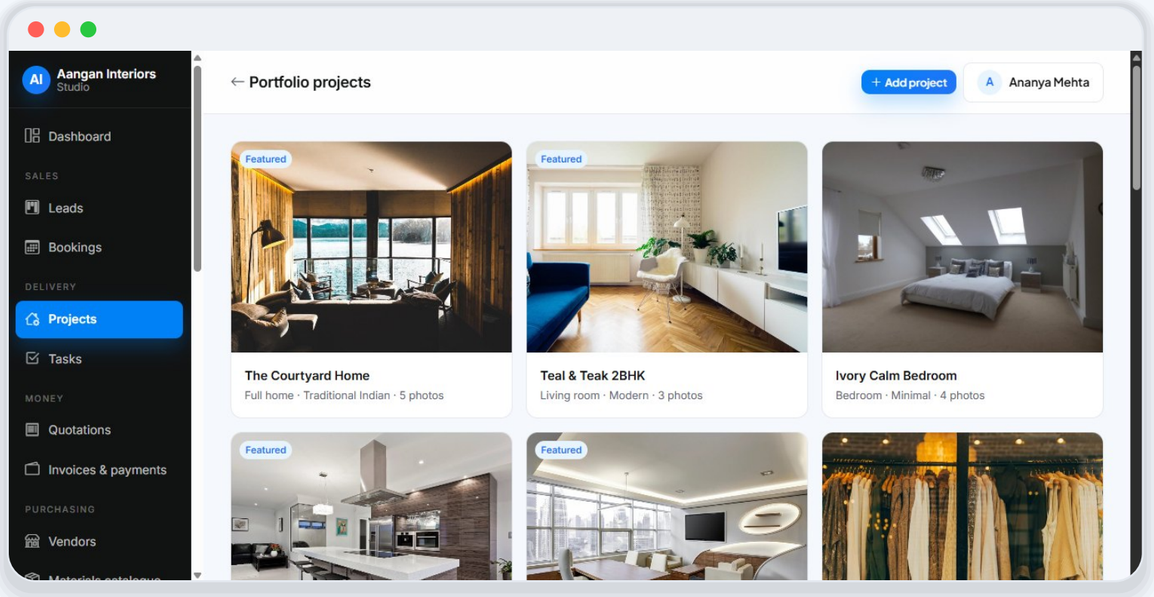

Bookings, quotations, payments and leads trigger ready-to-send WhatsApp messages from your own templates.

- **Booking confirmation** instantly, when a visitor books
- **Reminder 1 day before** for every consultation
- **“Quotation sent” & payment due** polite, on time, every time
- **New-lead alert to the owner** and follow-up after 3 quiet days
- **Editable & switchable** your words; one-tap “Send via WhatsApp” log

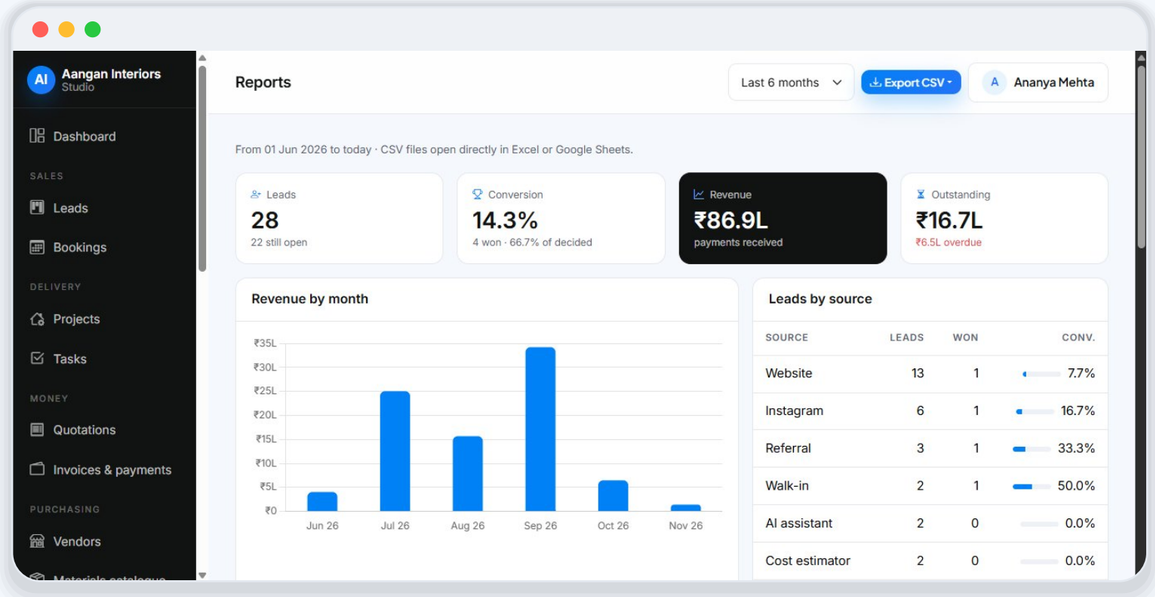

Today: every message is prepared and sent from your own WhatsApp in one tap. **Full version:** sent automatically through the WhatsApp Business API.

You stay in control — no developer needed

Website content (CMS)

Add projects and photos (auto-resized), before/after pairs, mood boards, services, testimonials, FAQs and homepage text. Live instantly.

Reports

Leads by source and conversion, revenue by month, outstanding payments with ageing — export to Excel/CSV in one click.

WHY IT FITS

Made for Indian studios. White-label for every client.

Feels made for India

- **₹ and Indian number format** ₹4,85,600 · lakh / crore
- **GST everywhere** CGST/SGST/IGST, GSTIN, HSN/SAC, Indian financial year numbering
- **UPI, bank transfer, cash, cheque** as payment modes
- **WhatsApp in every relevant place** site, ERP, portal, messages
- **1–4 BHK, villa, office, retail** Indian property types and budgets
- **Mobile-first** owner and clients use it on the phone

Your brand, your modules

- **Your name, logo and colours** everywhere: site, ERP, portal, PDFs
- **Personalised demo in minutes** we load your logo and project photos before we meet
- **Module switches** buy Website today, add ERP or AI later — same system
- **Your content, your control** CMS and knowledge base you can edit
- **Secure by design** private client logins, permissions, validated uploads
- **Fast** compressed images, lazy loading, light pages

WHAT WE COVERED

Everything working in the demo today

Website

- Home, about, services, FAQ, contact + map

FULL VERSION

Add-ons when your studio is ready

Shown as locked features in the demo. Each one plugs into the same system — nothing to rebuild.

SHOW THE DESIGN

- 3D / 360° walkthrough
- AR “view in your room”

GET PAID & ACCOUNT

- Online payments (Razorpay: UPI, cards)
- Advanced accounting & Tally export

RUN THE SITE

- Inventory & procurement (POs, stock)
- Attendance, payroll & contractors
- Mobile app for designers & supervisors

GROW & MARKET

- WhatsApp Business API auto-send
- Instagram & Facebook lead ads sync
- Google Calendar two-way sync
- Email campaigns
- Automatic Google review requests

SCALE & INSIGHT

- Advanced roles & multi-branch
- AI “Ask your business data”

We plan add-ons with you, one at a time, when your studio needs them.

HOW WE WORK

From first meeting to go-live in days, not months

1

See your own demo

We load your name, logo and project photos before we meet.

2

Choose modules

Start with what hurts most — add the rest any time.

3

Share your content

Logo, photos, services, FAQs, rates, GST and bank details.

4

Setup in 1–2 days

Configured, branded and checked on phone and laptop.

5

Training & go-live

A short session for you and your team; your own logins.

6

Support & grow

Help when you need it; new modules plug in later.

UNDER THE HOOD

Proven, maintainable stack (Python/Django, Bootstrap) · private logins per role, CSRF protection, permission checks, validated uploads, sanitised AI output · fast pages with compressed images · simple hosting and nightly backups · AI answers only from your approved knowledge.

Let’s set it up for your studio

See it live with your own name and projects — then pick the modules you need.

1. Book a 15-minute personalised demo

2. Share your logo & 10–20 project photos

3. Choose your package
